

## ONTARIO-JIANGSU INDUSTRIAL RESEARCH AND DEVELOPMENT PROGRAM (OJIRDP)

### **Eligible Use of Funds:**

Eligible expenses include costs and activities directly related to achieving the objectives for which the OCE funding was granted. All procurement activities must conform to [Broader Public Sector Accountability Act \(BPSAA\)](#).

### **Eligible Expenses:**

Actual costs directly attributable to and necessary for the completion of the project and are not wholly or partially for another purpose. One-time costs, directly attributable to implementation of the project; actual cash outlays that must be documented through invoices, receipts, or records - and are subject to verification by an independent auditor. Evidence of payment must be maintained for audit purposes. Costs incurred outside Ontario are ineligible unless otherwise approved by OCE.

### **In-kind Contributions:**

In-kind contributions are auditable and essential in carrying-out the project and must be thoroughly documented and justified. In-kind contributions may be cash equivalent goods and/or services, which represent an incremental expense that a project partner would not normally incur, and would have to be purchased using project funds, if not donated. In-kind contributions may include the project partner's personnel time; (providing direction, and participating in the project), services, access to special equipment, and supplies required to execute the project. Personnel time cannot exceed \$100 per hour, to a maximum of \$5,000 per month.

### **Retroactive Expenses:**

OCE will acknowledge expenses after the approval date. In cases where an application is not approved and activated, expenses are incurred at the risk of the applicant.

### **Institutional Overhead:**

This is an ineligible project expense and should not be included in the project budget. For applications from post-secondary institutions only, the overhead that is to be attributed as part of the OCE contribution will be calculated directly by OCE and paid annually to Ontario post-secondary institutions, at a rate of 20 per cent x direct costs of OCE-funded research

### **Capital Costs:**

Capital items (fixed assets) include equipment, testing tools, and instruments that have residual values as determined by Generally Accepted Accounting Principles (GAAP) at the end of the funding period. The eligible expense items allowed by OCE are the cost of utilization/depreciation of capital item (fixed assets) specifically required for the delivery of the eligible project. The prorated cost should be entered under "Operating Expenses" along with the justification.

### **Notes:**

**GAAP** is a collection of commonly-followed accounting rules and standards for financial reporting. The purpose of GAAP is to ensure that financial reporting is transparent and consistent from one organization to another.

**Residual Value** of an asset, the estimated amount that it will be worth at the end of funding period.

**Depreciation** is the systematic reduction in the recorded cost of a fixed asset.

**Travel outside of the province of Ontario requires a request for pre-approval from OCE which will include justification.**
